Art Unit: 3738

The Information Disclosure Statement received on February 6, 2004, has been considered.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 75-78, 80, 83-86, 88-96, 99, and 102-121 are rejected under 35 U.S.C. 101 because of the inclusion of non-statutory subject matter involving a human being (MPEP 2105, last paragraph). It is recommended that in claim 75, line 7, "contacts" be replaced by --is positioned to contact-- or --is configured to contact-- in order to avoid positive recitation of the stump itself, and that similar changes be made to the other independent claims.

Claims 75-78, 80, 83-86, 88-96, 99, and 102-121 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. The term "nonporous" or "non-porosity" is nowhere to be found in the original disclosure, and the Applicant has not provided any evidence that such a feature would have been gleaned from the examples at pages 29-32 or elsewhere in the specification by the ordinary practitioner. In fact, many of the originally disclosed embodiments involve *foamed* cushioning materials, as seen from the discussion on page 14, lines 6-19. Because of the procedure outlined in M.P.E.P. 2163.06 for interpreting the claims, it is noted that prior art may be applicable under 35 U.S.C. 102 or 35 U.S.C. 103(a) once the aforementioned problem under 35 U.S.C. 112, first paragraph, is corrected.

Art Unit: 3738

Claims 106-121 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 106, line 4, "said nonporous polymeric cushioning material" lacks a proper antecedent basis. Other similar errors were noted.

The Applicant's remarks have been reviewed. The examiner does not see how the passages at page 24, lines 25-27, and page 25, lines 1-10, of the instant specification provide support for the polymeric material being "nonporous". Moreover, nonporous materials appear to be inconsistent with overcoming the problems identified at column 1, lines 40-67, of parent US 5,830,237; attention is also directed to column 3, lines 20-24; column 4, lines 4-11; and column 6, lines 35-38, of said patent. If the polymers are nonporous, then how is it that antioxidants and other substances "can weep out on a time release basis" (US 5,830,237: column 11, lines 14-24; column 4, lines 4-7; present claims 88, 89, 102, and 103)?

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
